

CHARTS AND GRAPHS OF KEY FINDINGS

Freedom on the Net measures the level of internet and digital media freedom in 60 countries. Each country receives a numerical score from 0 (the most free) to 100 (the least free), which serves as the basis for an internet freedom status designation of **FREE (0-30 points)**, **PARTLY FREE (31-60 points)**, or **NOT FREE (61-100 points)**.

Ratings are determined through an examination of three broad categories:

- A. OBSTACLES TO ACCESS:** assesses infrastructural and economic barriers to access; governmental efforts to block specific applications or technologies; and legal, regulatory, and ownership control over internet and mobile phone access providers.
- B. LIMITS ON CONTENT:** examines filtering and blocking of websites; other forms of censorship and self-censorship; manipulation of content; the diversity of online news media; and usage of digital media for social and political activism.
- C. VIOLATIONS OF USER RIGHTS:** measures legal protections and restrictions on online activity; surveillance; privacy; and repercussions for online activity, such as legal prosecution, imprisonment, physical attacks, or other forms of harassment.
